Experience

CORPORATE AMERICA, ANYWHERE, US **Revenue Reporting Manager**

2003-Present

Outpatient facility specializing in both workers compensation and pain management health services with approximately 2.4 MM in annual revenue. Responsible for operational policies and procedures within the department including billing, scheduling, and essential daily patient documentation. Initiate and implement business improvement projects. Additional responsibilities include cost benefit analysis on service offerings, new hire training, and maintaining corporate relationships.

Selected Accomplishments include:

- Restructured departmental job titles and created a cross-training system to allow all employees to perform each departmental job task at a functional level to eliminate scheduling issues.
- Designed the "FIT4LIFE" program focused on post-rehab exercise. This program is currently being used by several workers compensation insurance providers and private pay customers.
- Designed a systematic approach to entering and maintaining patient database and changing necessary information on each patient visit. Designed additional tracking info including medications, and diagnostic testing.
